PROFESSIONAL SUMMARY

Working on AI-driven solutions spanning computer vision, video analytics, and Generative AI, with research experience in vision tasks and LLM fine-tuning. Experienced in developing end-to-end AI pipelines, building predictive models, and integrating retrieval-augmented generation into practical applications. Focused on advancing AI research through experimentation, model improvement, and real-world problem-solving.

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Engineering (AI & ML)	Newton School of Technology (ADYPU Pune)	8.11/10.0

INTERNSHIPS

Research Intern - Generative AI June 2026 - August 2026
iHub-Data, IIIT Hyderabad *Remote*

- Developed **CyberTriage-LM**, a cybersecurity-focused LLM using **Qwen2.5-7B** and **LoRA/QLoRA** for threat intelligence analysis and incident triage.
- Engineered a dataset pipeline for **5,000** cybersecurity records and implemented **4-bit quantization**, **supervised fine-tuning**, and **parameter-efficient adaptation**.
- Conducted GPU-based experiments using **Unsloth** and **PyTorch**, training only **0.53%** of model parameters and evaluating responses across cybersecurity scenarios.

Data Analytics Engineer June 2026 - Present
Fire AI *Mumbai, Maharashtra, India*

- Developed and optimized **100+ ClickHouse SQL queries**, handling complex data transformations, joins, aggregations, and multi-source analytics across production datasets.
- Built and enhanced **60+ BI dashboards and 60+ KPI widgets** across retail, e-commerce, and quick-commerce domains, translating business requirements into actionable insights.
- Conducted **end-to-end data validation and reconciliation across 5+ seller platforms**, identifying data inconsistencies, resolving KPI discrepancies, and ensuring reliable analytical outputs.

Research Intern – Computer Vision March 2026 - May 2026
iHub-Data, IIIT Hyderabad *Remote*

- Developed a YOLO-based computer vision pipeline for **road waterlogging detection**, integrating video preprocessing, dataset annotation, and model training using Python, OpenCV, Label Studio, and FFmpeg.
- Conducted model training and validation, achieving **70.28% mAP@50, 30.13% mAP@50–95, 62.23% precision, and 70.65% recall** for waterlogging detection.
- Evaluated detection performance through multiple metrics and iterative model experimentation, focusing on improving detection reliability for real-world road video analysis.

PROJECTS

Viora AI — Intelligent Image Quality & Defect Detection (Github) (Demo) August 2026

- Developed a **hybrid CNN + Computer Vision model** combining pretrained ResNet18 representations with 8 handcrafted visual features to predict perceptual image quality (qMOS) and analyze image defects.
- Evaluated three approaches on 1,511 test samples, achieving **0.2883 MAE, 0.3649 RMSE, 0.8566 PLCC, and 0.8156 SRCC** with the hybrid model, outperforming CNN-only and computer-vision baselines.
- Integrated **Grad-CAM explainability**, a FastAPI inference backend, MongoDB-backed analysis history, and a React interface for interactive image-quality assessment.

Agentic-Health-Support-System (Github) (Demo) February 2026

- Developed an **Agentic AI** healthcare assistant integrating **LLMs** and **RAG** for intelligent clinical decision support.
- Refined predictive models using **5-fold cross-validation**, achieving **91.8% accuracy**, **91.5% F1-score**, and **95.7% ROC-AUC**.
- Engineered a multi-agent RAG workflow with **LangChain, LangGraph, FAISS,** and **Hugging Face embeddings** for personalised recommendations.
- Implemented a **Streamlit** interface for AI-driven risk prediction and automated clinical report generation.

CERTIFICATIONS

Artificial Intelligence & Machine Learning Training Program iHub-Data, IIIT Hyderabad (Link) February 2026

- Completed a 24-week AI/ML Program covering Machine Learning, Deep Learning, CNN, NLP, TensorFlow, Model Deployment.

SKILLS

- **AI Frameworks & Libraries:** PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face, LangChain, LangGraph
- **Core Computer Science:** Data Structures and Algorithms, DBMS, Computer Networks, Data Mining (DM)
- **Programming Languages:** Python, C, JavaScript, TypeScript
- **Data Science & Analytics:** Pandas, NumPy, Pyspark, Data Warehousing, SQL, Analytics
- **AI & Machine Learning:** Deep Learning (DL), Natural Language Processing, LLM, Preprocessing & Overfitting Recall, Generative AI, RAG, Evaluation Metrics
- **Developer Tools:** Git and Github
- **Web Technologies & APIs:** FastAPI, React, MongoDB
